DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2 and 24-25, drawn to the conversion of an analog parameter signal to a digital value accessible by a processor, classified in class 341, subclass 126.
 - II. Claims 3-6 and 26-29, drawn to monitoring battery voltage, classified in class 702, subclass 63.
 - III. Claims 7-11 and 30-33, drawn to monitoring charging current, classified in class 320, subclass 137.
 - IV. Claims 12-18, drawn to a mobile communications device, classified in class 455.
 - V. Claims 20-23 and 34-37, drawn to monitoring temperature, classified in class 702, subclass 130.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because many different device (including mobile

Art Unit: 2857

communication device) parameters (including but not limited to battery voltage and/or battery charging current and/or temperature) may be monitored and may be supplied to a register of a processor. Thus, the numerous different inventions claimed may have applications in numerous fields, including but not limited to any computer-controlled system which has one or more analog sensors, any system which has a battery source of power, any mobile communication device, etc.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was not made to request an oral election to the above restriction requirement because the requirement is complex and/or the Examiner knows from past experience that an election will not be made by telephone. See MPEP 812.01.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2857

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick J Assouad whose telephone number is 703-305-3811. The examiner can normally be reached on Tuesday-Friday, 6:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc Hoff can be reached on 703-308-1677. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
